SUMMARY:

Excited to start a new career as a full stack developer. I am passionate in application development and enthusiastic of new technologies. Working together as a team is the most important as a software developer. Facing and solving problems.

TECHNICAL SKILLS

Frontend skills:

• **HTML5**	• **CSS**
• **JavaScript**	• **jQuery**
• **Bootstrap**	• **React**

Backend skills:

• **Node.js**	• **Express**
• **Handlebars/EJS**	• **MySQL/MongoDB**
•	• **Mongoose**

Other skills:

• **GitHub**
• **Searching with google**
• **Reading docs and online examples**
• **Copy and Paste**

PROJECT INVOLVED

1. Public Holiday Checker

   A pure frontend application wrote by HTML5, CSS, jQuery. Worked with other three group members. My duties are render the result in display section and using modal to show holiday info.

2. Wish list

   I work with other two team members. My jobs are designing the sequelize module to initialize SQL server database, coding the wish-list data api and html routes, setting up the handlebars for display data, writing frontend script for sending request calls to the server, and deploying all code on Heroku.
